Lifeguard, a Home Medical Response system, provides seniors living independently and persons at risk with a personal emergency response system that allows live voice-to-voice contact with a professionally trained emergency operator at the touch of a single button. The individual wears the small waterproof emergency transmitter pendant around the neck. One touch of the button activates the transmitter from a range of up to 250 ft.

Operator training allows for the assessment of emergency and non-emergency needs and establishes connections to help through a response list or area emergency rescue. Continuous 24-hour monitoring service. For caregivers, it is a link for quick intervention and communications when they cannot be there.

Monthly rental of system. Nothing to buy and use equipment only as long as needed. The initial installation of Lifeguard is for a period of 30 days. After the 30 days, it can be rented on a monthly, quarterly, or annually. The monthly rental and monitoring fee is generally under \$50
