Multiple Myeloma Research Foundation pursues means that accelerate the development of next-generation multiple myeloma treatments to extend the lives of patients and lead to a cure. Multiple myeloma, a cancer of the plasma cell, is an incurable but treatable disease. The foundation does research, and clinical trials and provides information.

The Foundation works with national leaders and other blood cancer organizations to advance public policy initiatives that accelerate and intensify efforts to bring new therapies to patients with blood-related cancers.

Service Area(s)

Nationwide
