English

The International Myeloma Foundation (IMF) funds myeloma research; health education; support groups both online and local in each state; free publications, plus educational videos and webcasts on myeloma, and the Myeloma Manager Software. The Myeloma Manager Software helps patients and caregivers deal with the glut of information and constantly increasing complexity of myeloma treatment programs.

The IMF has been conducting educational patient seminars, clinical conferences, and scientific workshops. They sponsor the International Myeloma Working Group (IMWGP) which brings together the world's leading experts. The website also provides up-to-date information about the ongoing clinical trials, new treatments, drugs and procedures.
