Care Trak offers a variety of security monitors and mobile tracking devices to help families keep potential wanderers safe. CARE TRAK monitors people who wander due to Alzheimer's Disease and other dementia related issues. The CARE TRAK Mobile Locator can find a lost person up to a mile on the ground using Telemetry (radio waves) tracking. Also serves parents who have children with Down Syndrome, Autism, Prader-Willi Syndrome, mental impairments and traumatic brain injuries. Care Trak works with police, sheriffs, search and rescue teams, and a new organization called Project Lifesaver International across the country.
