Eli Lilly (Lilly) may be able to help people who cannot afford the medications they need without assistance. Lilly medications are in the areas of mental health, diabetes, cardiovascular disease, men's health, osteoporosis, oncology and growth hormone disorders.

Go to [Prescription Assistance](#) for an explanation about prescription assistance and eligibility.

Some of the key eligibility criteria for the program are (1) enrollment in a Medicare Part D plan, (2) not eligible for both Medicare and Medicaid, (3) income at or below 200 percent of the Federal Poverty Level, and (4) proof of low-income subsidy denial.
