At Crohn's and Colitis Foundation, you can find information about Crohn's Disease, Colitis, and Inflammatory Bowel Disease (IBD). IBD stands for inflammatory bowel

disease, which is an umbrella term used to describe disorders that cause chronic inflammation of your gastrointestinal (GI) tract. The two most common forms of IBD are Crohn's disease and ulcerative colitis.

On the website, you can find a medical expert, learn about treatment options, diet and nutrition and much more.

We are a non-profit, volunteer-fueled organization dedicated to finding cures for Crohn's disease and ulcerative colitis, and improving the quality of life of children and adults affected by these diseases.
