The National Craniofacial Association offers services in three areas: Client Travel; Public Awareness; and Information and Support.

Provides information and referrals to persons with craniofacial disfigurement due to accident, disease, or birth. Publishes a brochure and newsletter describing craniofacial syndromes, medical treatments and association activities.

Provides financial assistance for expenses incurred while traveling away from home to a craniofacial center for reconstructive surgery and/or evaluation. Assistance is offered on the basis of financial and medical need and includes transportation, lodging and food.

Works to increase public awareness and understanding of the plight of those with severe craniofacial problems.
