The National Institute of Allergy and Infectious Diseases (NIAID) provides health information relating to allergies and infectious diseases (influenza, malaria, Sexually transmitted diseases, tuberculosis). The Institute also conducts and supports

research to better understand, treat and prevent infectious, immunologic, and allergic diseases. Key research areas include newly emerging and re-emerging infectious diseases such as tuberculosis and influenza, HIV/AIDS, biodefense, and immune-mediated diseases including asthma and allergy.

Visit the [planning and priorities](#) page on the website.

The General staff responds to telephone and letter inquiries concerning allergies and infectious diseases, and provides printed information on request.

Bus Line: Metrobus. Partially accessible to persons with disabilities.

Service Area(s)
