Often seniors, adults with disabilities, veterans, and caregivers have needs but don't know where to turn for help in finding critical information and services.

VirginiaNavigator, a free statewide public service, nonprofit, provides online comprehensive health and aging information to older adults, people with disabilities, veterans, and their caregivers supporting independence, confidentiality, dignity, and quality of life.

The VirginiaNavigator Speaker's Bureau was developed to help spread awareness and provide training to individuals throughout the Commonwealth. If you are interested in having a VirginiaNavigator representative provide a free, educational presentation for members of your organization, please contact Bonnie Scimone or Kim Tarantino.
