Craig Hospital is developing educational materials to help spinal cord injury survivors living in the community maintain their health. Craig "T. Rec" program offers materials that have to do with specific health concerns and complications, some focus on the aging issues of long-term spinal cord injury survivors and others have to do with personal care assistance, care giving and care receiving.

Online interactive health assessment tool is available at [Wellness and Risk Assessment](#).

The website contains list of health and wellness articles. Printed material available in English and Spanish.
