Comprehensive driving services are managed and provided through the Occupational Therapy (OT) Department. The Adaptive Driving Program is coordinated by occupational therapists with specialized training in adapted driving. The program provides evaluation of driving potential, devices required for safe and effective vehicle control by the individual, and on the road training in use of the devices. Recommendations are also provided for van and car modifications for wheelchair access and tie-downs.

There are many specialized driving program offerings provided by the Driving Rehabilitation Specialists. Please call for more information.
