The National Rehabilitation Hospital (NRH) Driver Training Program is the only fully-equipped program in the Washington metropolitan area available to persons with disabling injuries or illnesses to return to driving or who want to learn to drive for the first time.

In addition, the program is also open to older drivers and persons who may not drive

but require transfer and safety training. The driver training staff includes licensed, registered occupational and physical therapists, rehabilitation engineers, and Certified Driver Rehabilitation Specialists. The program offers services ranging from pre-driving evaluations and education to assistance with purchasing adaptive equipment and vehicles.

For more information on the NRH Driver Training Program, or to schedule an evaluation, please call 202-877-1035.
