Willis Falkenberg Eye Care is now SIEHT: A Falkenberg Eye & Laser Center. We specialize in advanced laser vision correction and custom cataract surgery; utilizing leading-edge surgical technology and techniques. Cataracts make images cloudy. Symptoms of cataracts are dimming, glare around lights, double vision, colors appear less brilliant, feeling of film over the eyes, etc. The only way to remove cataracts is surgically, and a replacement lens provided.

LASIK: Schedule a LASIK evaluation to see if you are a good candidate for LASIK for vision correction. New technology and process makes this procedure safe, simple and fast. Call for information.
