Spotsylvania Regional Medical Center's Charity Care policy applies to patients who have received non-elective care and do not qualify for state or federal assistance

and are unable to establish partial payments or pay their balance. This policy provides financial relief to patients who qualify based on a comparison of their financial resources and/or income to Federal Poverty Guidelines.

To qualify for charity care, uninsured patients will be asked to complete a simple form and to provide additional income and resource verification information.

Also available is an uninsured discount program designed for uninsured patients who do not qualify for Medicaid, charity care, or any other discount program one of our facilities may offer, and whose household financial resources and/or income is more than 200 percent of the Federal Poverty Level. These patients receive a bill that reflects a discount on total charges.

Financial counselors will work with financially-challenged patients to establish an appropriate payment plan based on the amount due and the patient's financial status. To offer discounts and other financial relief, please recognize that patients will be asked to cooperate with the financial counselors by providing them with essential financial information. Translation services are available.
