Donate the Gift of Life. Organ donation begins with a person who recognizes an opportunity to help others, enrolls in a state donor registry and shares the decision to be a donor with family members and friends. The culmination of the process occurs when the person donates -- and saves or enhances the lives of as many as 8 people who need an organ transplant or tissue. You are never too old.

Visit [Giving an Organ](#) for more information. If you or someone needs an organ, visit [Getting an Organ](#).
