The Children's Hospital of the King's Daughters Care Connection for Children (CHKDCCC), sponsored by the Virginia Department of Health, is a statewide network of regional programs that provides health care coordination, community support and resources to children who have chronic physical health care needs.

Professional care coordinators work closely with children and their families to provide targeted, comprehensive and culturally appropriate care. These professionals coordinate all services offered by the various providers to children in need, and they actively seek input from families and medical practitioners to achieve the best possible results.

The care connection coordinators offer and provide information and referrals for medical visits, accessing medical services, counseling, health care payment options, school issues, social supports and community resources.
