The Diagnostic and Assessment Clinic is designed to provide direct services to children and their families, as well as to offer a training experience for students and practitioners. This unique service offers a comprehensive diagnostic assessment for children 18 months and older for whom a diagnosis of autism or another pervasive developmental disorder is suspected.

The child's parents are included as full partners in the assessment team. Community-based practitioners who are involved in the education or treatment of the child are welcome as members of the assessment team, at the invitation of the child's parents.
