The iWALK Recovery Center™ represents a unique vision of what therapy can be and a place to explore what is possible. It is designed to take advantage of the brain's neuroplasticity, its ability to compensate for injury using old and new connections to recover lost function. While the fastest recovery is likely to occur early on in treatment, research shows that improvement can be made long after an injury.

Designed to meet the needs of both acute and chronic conditions, the iWALK Recovery Center™ is a specialty program offered by Sheltering Arms that provides research-driven, state-of-the-science care from thoughtful clinicians with expertise working with patients who have experienced a neurological injury or illness.

The advanced technological equipment and clinical techniques can only be accessed together in the iWALK Recovery Center at Sheltering Arms. The high-tech capabilities and expertise of the staff combined in one place make the iWALK Recovery Center a unique program designed to produce the best results for patients. The innovative technology includes:

- Andago® ,
- Indego® Exoskeleton,
- ZeroG™ ,
- Lokomat® Pro - With Virtual Environments,
- Erigo® Pro Bionic Leg Support,
- Power Plate Vibration Platform,
- V.I.E.W.,
- L300 Go,
- SMART Balance Master® ,
- GAITRite,
- RT300 FES Cycle,
- Split-Belt Treadmill.

Sheltering Arms therapists are trained and certified to use all the equipment at the iWALK Recovery Center.
