VCU Health's Children's Hospital of Richmond offers Pediatric Speech Therapy. They will complete a comprehensive evaluation and work with you to develop a treatment plan to help your child reach their goals. Each plan is individualized and includes

caregiver training and home programs to ensure carryover to all environments.

Speech/language therapy services can help kids of all ages and abilities communicate more through:

- Assistive technology
- Cognitive skills
- Articulation and phonology
- Feeding and swallowing
- Fluency
- Oral motor function
- Voice therapy
- Receptive and expressive language
- Pragmatic language and social skills
