Licensed Behavior Analysis offers therapeutic consultative services. Applied Behavior Analysis (ABA) is the study and application of behavior modification that focuses on learned selectivity or individual responses that are determined and repeated due to the consequences experienced. Following the identification of challenging behaviors, services include:

- descriptive interviews
- completing behavioral assessments
- coordinating data collection
- clarifying recommendations for treatment

Through the reduction of behavioral excesses and the ongoing exercise of replacement behavior, the licensed staff delivers individualized, therapeutic procedures to initiate meaningful gains.
