360 Behavior Consulting features experienced Board Certified Behavior Analysts who deliver Therapeutic Behavior Consultation to individuals receiving the Community Living (CL) or Family and Individual Support (FIS) Virginia Developmental Disabilities Waiver. This service is offered in either English or Spanish. Behavior consultation service encompasses conducting an initial assessment and collaborating with the individual and multidisciplinary team to create a positive behavior support plan that is rooted in the principles of Applied Behavior Analysis. The plans aim to address challenging behaviors across various environments while increasing prosocial behaviors. The team works with staff and family members to implement interventions consistently and proactively to reduce interfering behaviors. Teaching meaningful replacement behaviors to increase functional communication is a priority. When individuals can communicate their wants and needs, they can maintain autonomy over their lives. With backgrounds in special education, the team teaches and models interventions across various settings. Proactive interventions, skill development, and the least intrusive methods are also prioritized. 360 Behavior Consulting employs a person-centered, culturally sensitive, and trauma-informed approach to foster meaningful behavior change for the individuals served. Team experience and evidenced based interventions empower individuals of all ages to flourish and reach their fullest potential.

Virtual service is available anywhere in Virginia.
