Hope Family Services offers Applied Behavioral Analysis through remote therapy consultations via a secure video chat.

Behavior analysis is the science of behavior, with a history extending back to the early 20th century. Its guiding philosophy is behaviorism, which is based on the premise that attempts to improve the human condition through behavior change (e.g., education, behavioral health treatment) will be most effective if behavior itself is the primary focus.

Because this approach applied behavior analysis (ABA) is largely based on behavior and its consequences, techniques generally involve teaching individuals more effective ways of behaving through positive reinforcement and working to change the social consequences of existing behavior.

Service Area(s)

Statewide
